# Inspiration – Paul Ekman

ATLAS OF EMOTIONS

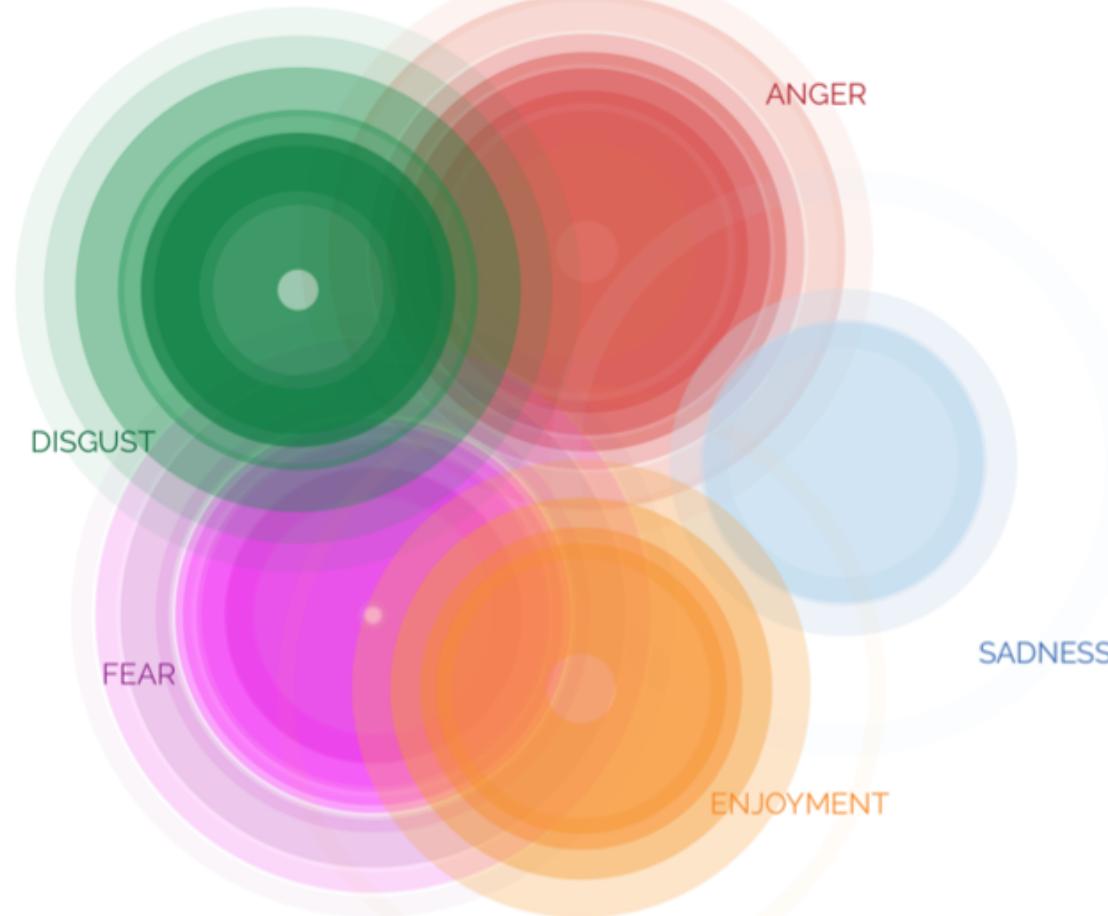

## Our Experience

Most emotions researchers agree on these five Universal Emotions: emotions that all humans, no matter where or how we were raised, have in common. The movement of the shapes reflects the fluid nature of emotions – the way their strength and frequency varies from moment to moment. Select an emotion to learn more.

<http://www.arttherapyblog.com/online/color-psychology-psychological-effects-of-colors/#coolcolors>

# Objectives

- Creating environments to reflect moods based on colour
- Easy to navigate through moods
- Also have a different page where they can go through random images without a curated mood

# Audience

- Anyone interested in how colours affect emotions/moods
  - Setting moods (using the images as backgrounds etc.)
  - People looking for inspiration for colour palettes?
- 
- Not really for phone screens because they are too small and it won't be as impactful

# Content Requirements

- Photographs of spaces to edit
- Images from the internet to edit
- Minimal text only for lists / titles / navigation
- Definitely no video or audio

# Functional Requirements

- Should be able to navigate through the pages easily
- No dead-ends – all main pages should connect to each other
- Images are not clickable unless I learn how to make pop-up or zoom

# Layout Inspiration
